

Built on experience since 1983. Driven by innovation.

Glanville
ENVIRONMENTAL

An Adler & Allan company

**Delivering Complete
Environmental, Civil
& Infrastructure Solutions
Across the Southwest**

Leading the South West in Drainage, Civil Engineering & Environmental Solutions

About Glanville Environmental

Established in 1983, Glanville Environmental is a trusted drainage and civil engineering contractor operating across the South West. Now part of the Adler & Allan Group, we have expanded our capability to deliver integrated environmental and infrastructure solutions across the UK.

With over 200 skilled professionals based at six strategically located depots, we provide a comprehensive range of services across a range of specialist divisions.

What We Do

Civil Engineering & Drainage

We offer end-to-end civil engineering services, covering the full project lifecycle from planning to completion. Our teams are experienced in:

- Sewer installation, repair and rehabilitation
- Manhole construction and rehabilitation
- Pump station and CSO installations
- Above- and below-ground drainage solutions
- No Dig and Trenchless solutions delivered by our Award Winning Trenchless Division
- Fencing and remedial landscaping

Environmental Services

Our fleet and specialist crews deliver a wide range of environmental services, including:

- High-pressure water jetting
- Gully cleansing and septic tank emptying
- Liquid waste transportation
- Advanced CCTV surveying and mapping

Our Core Services

- Geospatial services & digital twin/asset management
- Confined space search and rescue
- Railway infrastructure support

Fleet Services (Workshop Division)

Our in-house Workshop Division ensures our fleet, and those of third-party clients, stay roadworthy, compliant, and efficient. Services include:

- Vehicle maintenance and servicing
- Fleet repairs and inspections
- Support for commercial operators across the region

Training Academy

Our purpose-built training academy boasts a diverse selection of industry-specific, nationally recognised, and accredited courses, including:

- Plant & Machinery
- Construction
- Confined Space Training

As a market leader in the South West's drainage sector, we're known for delivering professional, efficient, and cost-effective solutions for the water industry. We combine industry-leading talent with innovative techniques to successfully complete even the most complex projects.

Whether working on infrastructure, environmental response, or routine maintenance, Glanville Environmental is committed to safety, sustainability, and service excellence to both commercial and domestic clients.

Our Commitment to Sustainability

Committed alongside our key partners and supply chain in the water industry, our 'Further Than Zero' campaign looks at bringing carbon emissions down to below zero with the hope of becoming carbon negative.

Our focus on sustainability is providing a comprehensive plan on how we can sustain this for the future.

**Delivering
Safely**

Safety is our number one priority in all aspects of our operations, ensuring everyone thinks safe, works safe and goes home safe.

**Embracing
Collaboration**

We strive to maintain strong relationships by closely collaborating with all stakeholders.

**Protecting
Our Environment**

We are committed to carbon reduction and have developed a four-step roadmap to reach our net zero target of 2028, striving to be carbon-negative by 2030.

**Innovative
Thinking**

We are deeply committed to pioneering approaches that guarantee the safe and efficient execution of our operations.

**Progressing
with Ambition**

We are driven by our ambition to maintain our position as a leader in the South West region, excelling at what we do.

**Investing in
Our People**

Our people are our best asset, and we are committed to fostering an exceptional work-place environment and aiming to be an employer of choice in the Southwest.

Company Values

At Glanville Environmental, our core values drive our dedication to achieving the company's vision and mission, ensuring we consistently deliver exceptional service to our clients. Sustainability and ethical practices are at the heart of everything we do, guiding our operations to not only meet regulatory standards but also make a positive impact on the region we call home. By embracing these values, we cultivate a culture of accountability and collaboration, empowering our team to make informed, responsible decisions that contribute to the company's long-term success.

- SAFETY.
- COLLABORATION.
- ENVIRONMENT.
- INNOVATION.
- AMBITION.
- PEOPLE

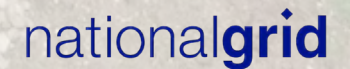

Providing End-To-End Solutions

With over four decades of unmatched expertise in drainage and civil engineering, we are committed to delivering exceptional workmanship from inception to completion. Our comprehensive cradle-to-grave service includes meticulous project management, seamless coordination, innovative design, diligent construction, and timely delivery of both above and below ground drainage schemes

Who We Work With

Working collaboratively with our key partners and supply chain, Glanville Environmental delivers innovative, high-quality solutions for vital wastewater enhancement and improvement framework schemes across the South West's wastewater network.

OVERVIEW

At Glanville Environmental, our Civils Division brings extensive expertise in delivering efficient, safe, and compliant civil engineering services. Working across a variety of sectors, including water, utilities, highways, and construction, we specialise in delivering infrastructure and groundworks projects that are completed on time, on budget, and to the highest standards.

From excavation and installation to reinstatement and project management, we offer end-to-end solutions tailored to the needs of our clients. Whether working on public highways, private developments, or sensitive environmental sites, our skilled teams operate with precision, professionalism, and a commitment to safety.

Our Services Include:

- Drainage & Sewer Installation** – Gravity and pumped systems for both foul and surface water
- Utility Infrastructure** – Trenching, ducting, and service connections
- Deep Excavations** – Fully risk-assessed, including shoring and confined space entry
- Reinstatement Works** – Tarmac, concrete, and modular surfacing
- Road & Footpath Construction** – New builds and repairs
- Bridge & Culvert Works** – Minor structural repairs and maintenance
- Section 278 & 106 Works** – Adoptable highway and drainage

CIVILS

construction

- Site Clearance & Enabling Works** – Preparing land for development or infrastructure upgrades
- Chamber Construction** – Brick and pre-formed chambers for utilities and water networks
- Emergency Call-Out Services** – Reactive civil engineering support for urgent repairs

Fully Accredited & Trusted:

We hold the necessary certifications and accreditations to work on behalf of local authorities, water companies, and major developers. Our operatives are fully trained in confined space entry, street works, and health and safety procedures, ensuring all projects are completed safely and compliantly.

Collaboration Across Divisions:

Our Civils Division works seamlessly with Glanville’s CCTV, Drainage, Waste Management, and Geospatial teams to provide integrated services, from asset mapping and surveys to excavation and post-installation inspection. This ensures better coordination, faster delivery, and greater value for our clients.

From essential infrastructure to complex reinstatement projects, Glanville Civils is your trusted partner for professional, dependable civil engineering.

Delivering Reliable Civil Engineering Solutions Across the Southwest

OVERVIEW

Glanville Trenchless offers advanced trenchless (no-dig) solutions for drainage and sewer systems across the South West. Our methods minimise excavation, reduce disruption, and deliver long-lasting results for both domestic and commercial clients.

We specialise in difficult-to-access and sensitive environments, using innovative techniques and global technology partnerships to ensure efficient, sustainable outcomes.

Key Services:

- **Cured-In-Place Pipe (CIPP) Lining**
Custom resin-impregnated liners cure in place
Structural, corrosion-resistant, and adaptable to many pipe types
Includes full-length or patch repairs
- **Pipe Bursting**
Breaks old pipe while pulling in new one
Suitable for pipe upsizing with minimal excavation
- **LED Lining (UV Curing)**
Faster curing, lower emissions, high durability
Uses LED light heads and resin liners

- **Top Hat Lateral Connection Repairs**
Seals lateral pipe connections with internal top hats
Prevents infiltration and improves performance
- **VIP WECO Seals**
Ideal for internal joint sealing
Flexible and durable for pressure pipes and culverts
- **Manhole Chamber Sealing & Refurbishment**
Repairs, coatings, and leak sealing
Prevents infiltration and extends manhole life
- **Robotic Cutting & Patch Repairs**
Robotic tools for internal cutting and prep
Resin patch systems for localised pipe damage
- **Specialist Linings & Reinforcement**
Fero Force® for high-strength applications
Pitch fibre pipe rehabilitation

Our excavator teams provide precision support for trenchless installations, including drain positioning and excavation.

Why Trenchless?

- Minimal surface disruption and faster turnaround times
- Safe and effective for remote or restricted-access sites
- Reduces cost by avoiding road/pavement reinstatement
- Environmentally friendly – up to 99% lower CO₂ emissions with UV curing
- Durable results with a 50+ year pipe lifespan

TRENCHLESS

OVERVIEW

Glanville Cleansing provides professional, efficient drainage and waste solutions for commercial and domestic clients. Backed by a highly skilled team and a specialist fleet, we deliver reliable results, on time and to the highest standards.

Our Services Include:

- **High-Pressure Water Jetting:**
Blockage clearance, desilting, root cutting, fat removal, and descaling.
Pressure range: 1,000–10,000 psi.
Remote access and WJA-compliant.
- **Septic Tank & Interceptor Cleaning:**
Fast, safe, and ethical emptying with full system checks and CCTV support
- **Waste Tankering & Vacuumation:**
Fleet capacity from 5,500L to 30,000L.
Includes sludge, effluent, oil, treatment plants & more.
24/7 emergency service available.

- **Specialist Fleet:**
Jet Vac recyclers and combination units
Gully emptiers & van-pack jetters
Remote reel systems for restricted access

Why Choose Cleansing?

- 24/7 service
- Environmentally responsible
- Fully certified team
- Covering Devon, Cornwall, Dorset & Somerset

Expert Drainage & Waste Services Across the South West

CLEANSING

OVERVIEW

Our CCTV Division specialises in high-definition drainage and infrastructure surveys, delivering precise, reliable data for assets across a wide range of environments, from domestic drains to large-scale culverts, tanks, chambers, and pipelines over 2,000mm in diameter.

Using cutting-edge CCTV technology, including full pan-and-tilt camera systems, ROVs, sonar, and self-contained remote units, our fully qualified surveyors conduct accurate internal inspections, no matter how confined or remote the location. We provide electronic data packages, including optional cloud-based access, giving clients 24/7 availability to reports and video footage from any location.

What We Do:

- **Pipeline CCTV Surveys:** Condition reporting for pipes from 40mm to >2,000mm using HD camera systems.
- **Manhole & Chamber Inspections:** Full level surveys, structural condition assessments, and confined space entries.
- **Asset Mapping & Tracing:** Location, layout, and connectivity of underground drainage networks.
- **Pre-Build & New Connection Surveys:** For developments requiring local authority approval.
- **Structural Assessments:** Condition analysis for outfalls, culverts, pump stations, CSOs, buildings, and tunnels.

- **Pollution & Flood Investigation:** Fast, reactive CCTV deployment to assess incidents and locate causes.
- **Specialist Drainage Projects:** Including impermeable area surveys, gully surveys, misconnections, and complex treatment works mapping.
- **Technology & Expertise Equipment:**
 - Pan-and-tilt HD camera units
 - Remote access and battery-operated systems
 - Wincan VX reporting software
 - ROV and sonar systems
- **Certified Personnel:**
 - WRc OS20X/21X qualified
 - PTS-trained for railway environments
 - Confined space trained (C&G/SQA 6150-61 standards)
- **Data Delivery:**
 - Digital reports with visual media
 - Optional cloud-based system for secure online access
- **Confined Space & Rail Capabilities:**

Our teams are trained in confined space operations and rescue procedures, offering safe and compliant access to even the most hazardous locations. We also supply PTS-certified operatives for CCTV and drainage work on rail infrastructure, fully audited and safety-certified.

Why Glanville CCTV?

With rapid deployment, robust reporting, and a team of seasoned professionals, we're the go-to partner for reliable, future-ready CCTV surveying across the Southwest.

OVERVIEW

At Glanville Geospatial, we combine our experience with the latest technology to deliver precise measurement, monitoring, and inspection services for a broad range of industries. From complex construction sites to historic estates, we provide tailored solutions that ensure clarity, accuracy, and project confidence, every time.

Whether you need a detailed topographic survey, advanced utility mapping, or confined space drone inspections, we offer a fully integrated, end-to-end service designed to support your project from initial concept through to final delivery.

Comprehensive Surveying Expertise:

We understand the demands of modern infrastructure and construction projects. That’s why our team uses the latest surveying tools, from 3D laser scanners to drones and GIS platforms, to deliver dependable, high-quality results. Our services are trusted by:

- Utility providers
- Local authorities and councils
- Architects and consulting engineers
- Construction and civil engineering firms
- Universities and historic estates
- Quarries, mines, and renewable energy developers

GEOSPATIAL

Working closely with our sister divisions, we ensure a seamless cradle-to-grave service, offering complete continuity across even the most complex developments.

Our Services Include:

- Topographic Surveys** – Accurate mapping of land features for planning and design
- Confined Space Drone Surveys** – Safe, efficient inspections of hard-to-reach areas
- Unmanned Aerial Surveys** – Drone-based capture for rapid, large-scale coverage
- Utility Mapping** – Detection and mapping of buried services
- Laser Scanning & BIM** – High-resolution 3D data for modelling and design integration
- 4D Monitoring Surveys** – Structural movement and deformation tracking over time
- Hydrographic & Geophysical Surveys** – Detailed subsurface and underwater data capture
- GIS Asset Mapping** – Digitised data visualisation for infrastructure and asset management
- Site Engineering & Setting Out** – On-site precision to guide construction accuracy

Every deliverable is tailored to suit your needs, clear, detailed, and designed to support critical decision-making throughout your project lifecycle.

OVERVIEW

Glanville Training Academy delivers high-quality, professional training tailored to the construction, industrial, and commercial sectors across the South West of England. With over 30 years of hands-on industry experience, we understand the challenges faced on site, and we've built our courses to meet them head-on.

Our purpose-built training centre in Plymouth is home to a wide range of accredited courses, delivered by seasoned trainers who combine practical expertise with engaging instruction. Whether you're looking to improve workforce compliance, gain essential certification, or develop new skills, we offer flexible training solutions that work for your business.

We provide:

- Nationally recognised qualifications from awarding bodies including NPORS, SQA, CITB, and EUSR
- Customised training programs to meet specific job roles, safety requirements, or company standards
- On-site and off-site training options, with free quotes and flexible scheduling

Ongoing support from course booking through to certification

Our Course Offerings Include:

Plant & Machinery – Excavator Above & Below 10T, Forward Tipping Dumper, Excavator Lifting Ops, Telescopic Handler

Construction & Utilities – Deep Excavation, Butt/Electro Fusion Welding, Abrasive Wheels, Manual Handling, Cable Avoidance

Health & Safety – CSCS, COSHH, Asbestos Awareness, Face Fit Testing

Confined Space Training – Low, Medium & High-Risk Entry (SQA-accredited)

Specialist Training – High-Pressure Water Jetting, Trailer Awareness, Site Safety Awareness

Our mission is to raise the standard of training across the South West, bridging the quality gap with a professional, accessible, and tailored service that ensures every trainee leaves confident, compliant, and job-ready.

At Glanville, we're not just a training provider, we're your partner in building a safer, stronger, and more skilled workforce.

To learn more or book a course, call 01752 712909 or visit our website www.glanvilletraining.co.uk.

Accredited Training. Practical Expertise. Local Delivery.

OVERVIEW

Located in Plympton and serving the wider South West, Glanville Workshop offers expert maintenance and repair for commercial vehicles and plant machinery. We have combined our industry knowledge and our own in-house and mobile technician teams ensure your fleet stays safe, compliant, and operational, wherever you are.

Our Services:

- LOLER Testing – Certified lifting equipment inspections
- 6-Weekly HGV Checks – Routine safety inspections
- Vehicle Brake Testing – For all vehicle types
- HGV & LGV Maintenance – Full-service care for large and light goods vehicles
- Breakdown Assistance – Rapid mobile response across Devon & Cornwall
- Car & Van Servicing – From basic maintenance to major repairs
- HGV MOT Pre-Checks – Preparation for smooth testing success
- Tyre Supply & Fit – For vans, cars, and fleet vehicles
- Plant Maintenance – Diggers, dumpers, and more
- Class 4 & 7 MOT Testing – Coming Soon

State-of-the-Art Facilities:

Our purpose-built, four-bay workshop includes:

- HGV pit and brake test bay
- MOT ramp and vehicle lifts
- Welding facilities and tyre-changing equipment

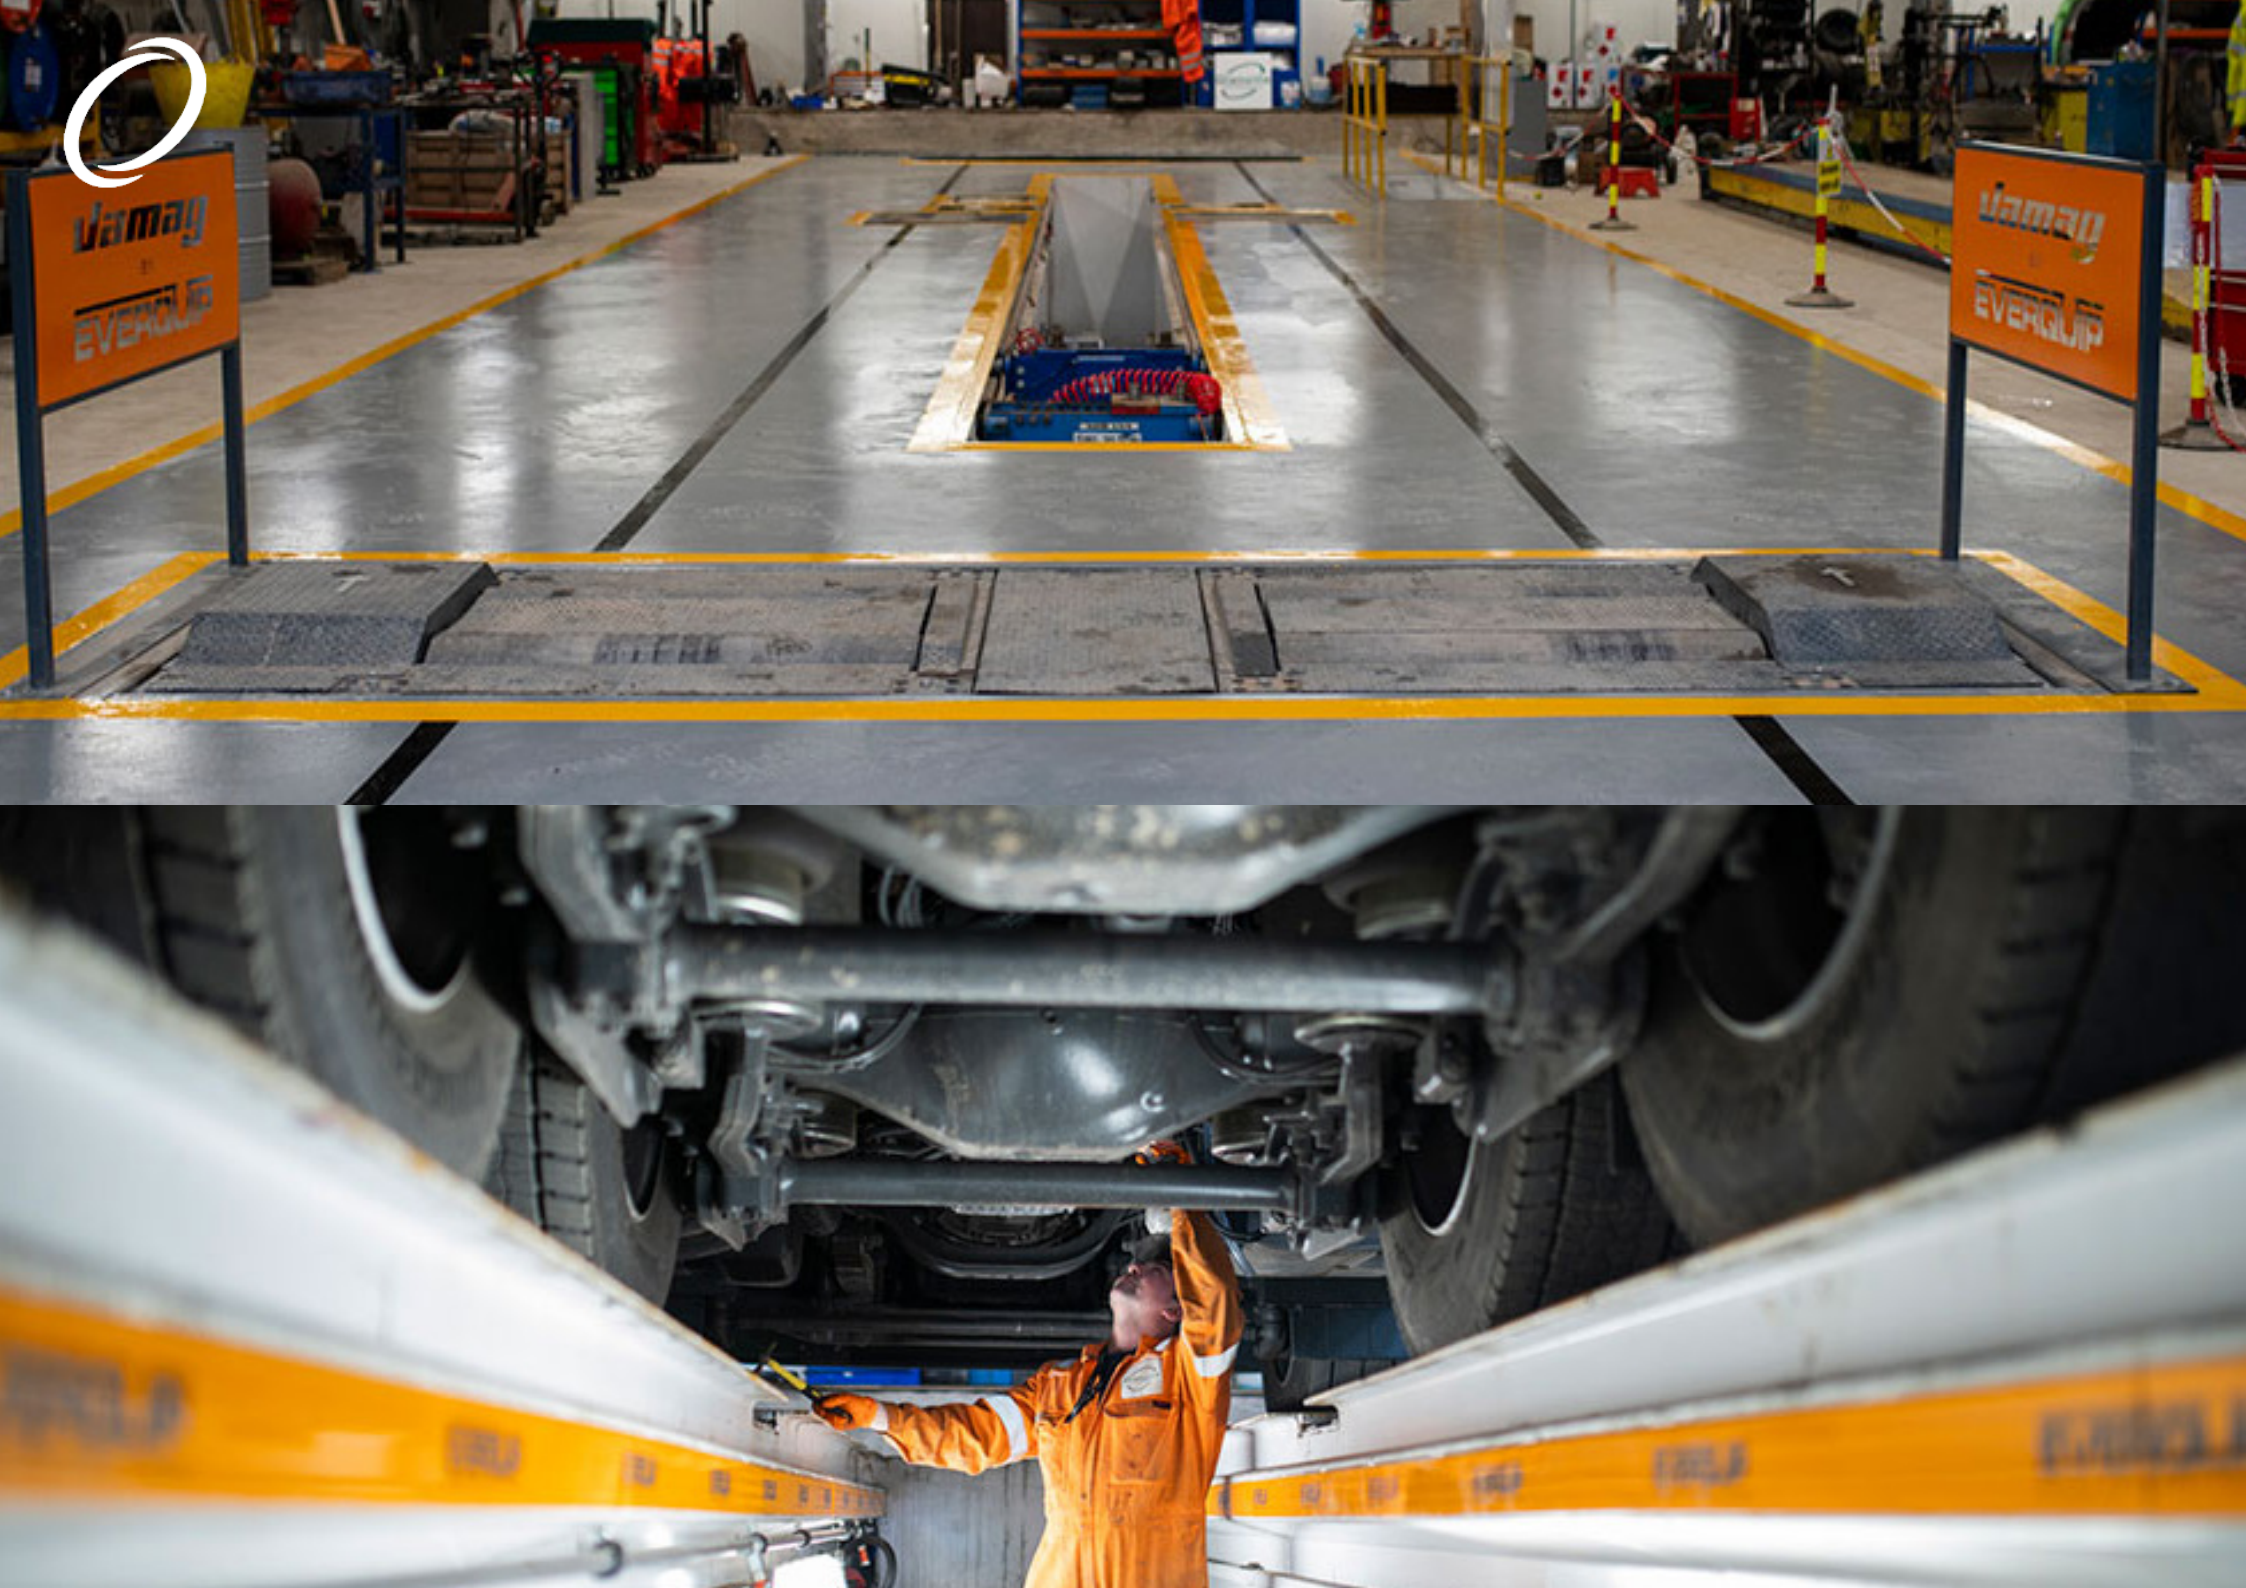

We're equipped to handle everything from daily fleet servicing to emergency repairs, all with speed and precision.

Why Choose Us:

- Expert Team** – Decades of hands-on industry knowledge
- Full-Service Offering** – Vans, HGVs, and plant machinery covered
- Mobile Support** – Fast, reliable on-site repairs
- Customer Focus** – Tailored services built around your schedule

Contact us to book a service or request mobile assistance today.

Keep your fleet moving with confidence. Choose Glanville Workshop.

FLEET SERVICES

OVERVIEW

As part of the Glanville Environmental family, with decades of expertise in drainage and civil engineering, we provide comprehensive commercial fencing and landscaping solutions for businesses across the South West and beyond.

Our reputation is built on quality workmanship, high-grade materials, and exceptional customer service. Every project is tailored to your specific needs and budget, ensuring we deliver solutions that last. From boundary demarcation to complex, high-security installations, we set the benchmark for reliability, efficiency, and finish.

Our Services

- Fencing
- Chain link, palisade, mesh, timber, and bespoke designs
- High-security fencing systems
- Automated gate installation and access control
- Repairs and ongoing maintenance
- Temporary site hoarding solutions
- Landscaping
- Hard and soft landscaping for commercial sites
- Grounds maintenance and tree care
- Public space and housing development landscaping
- Erosion control and planting schemes

Our Expertise

We understand the demands of large-scale commercial operations such as new-build housing, public realm developments, and infrastructure projects. Using the latest technology and proven methodologies, we deliver projects safely, efficiently, and to the highest standards.

Our approach is end-to-end, from initial consultation and design to installation and aftercare, meaning you have one provider for all your commercial fencing and landscaping needs.

Why Choose Glanville?

- Proven track record in commercial and high-security projects
- Skilled, in-house installation teams
- Quality materials for durability and performance
- Tailored solutions to suit your project requirements
- Commitment to safety, sustainability, and client satisfaction

FENCING & LANDSCAPING

OVERVIEW

Glanville Waste Management delivers professional, sustainable waste collection and treatment services from our fully licensed facility in the South West. Our focus is on reducing environmental impact through efficient processes, responsible disposal, and maximum recycling.

Fully Licensed, Fully Compliant:

Our on-site treatment plant is licensed by the Environment Agency and South West Water, capable of processing up to 300m³ of wastewater per shift. This allows us to handle high volumes while maintaining the highest environmental and safety standards.

Specialist Waste Services:

- Collection and treatment of liquid waste, sludge, FOG, and industrial effluent
- Multi-stage treatment process including aeration, biological breakdown, and polymer application
- Rigorous quality control and compliance testing before discharge
- Final effluent safely discharged into the South West Water system or applied to land, in line with regulations

Why Choose Us

- Environmentally responsible operations with a focus on recycling
- Fully traceable and auditable waste handling
- Efficient turnaround and cost-effective solutions

Efficient. Compliant. Environmentally Responsible.
