## Civils Works Supervisor

Glanville Environmental request applications for the role of Civils Works Supervisor.

Working from our Bodmin depot, the successful candidate would undertake this role in delivering Civils Drainage repairs for our key client. They will be responsible for many aspects of job supervision predominantly within a reactive contract and environment, and must have the ability to undertake the following key activities and responsibilities:

- Visit site and collect information for scoping and planning
- Give advice on scope/design requirements to achieve a solution
- Assist in planning projects for delivery including highways liaisons, public liaisons, labour, plant and materials requirements
- Use of computer software (predominantly Microsoft Office) to produce site documentation and Close Down documents
- Suitable time management skills to see projects through to completion and hit deadlines
- Oversee works on site from an engineering, supervisory and safety view point
- Be available to join on the Emergency Out of Hours rota
- Have flexibility to work evenings and weekends in line with reactive works

Desirable Skills and Qualifications:

- Relevant qualifications and experience in delivering engineering projects within the utilities sector, ideally within water and waste water sectors including SMSTS
- Have knowledge and experience in Streetworks especially around Streetworks requirements in line with traffic control and excavating within the highway
- Excellent organisational and communication skills
- Team Management skills
- Full UK Driving licence + towing and LGV
- Understanding of and qualifications in Temporary Works
- Have a good knowledge of deep excavation works within the Utilities and ideally the drainage sector

The above list is not exhaustive but gives a guide to the work we undertake and the qualities required of a successful candidate. Glanville Environmental offer a competitive package for this role and look to have a start date in April or May 2021 depending on applications.
